EXPERIENCE

Liability Claims Adjuster

2019 – July 2020

Allstate

Chandler, AZ

Investigate single and multi-vehicle auto accidents using innovative tools and technology to capture recorded statements, photos and/or the review of police reports to resolve losses. Communicated with customers and claimants to gather data, analyze evidence, determine and discuss final liability decisions with customers. Negotiate claim settlements with third party insurance companies in accordance with business unit standard methodologies.

Short Term Disability Claims Examiner

2018 – 2019

Prudential

Scottsdale, AZ

Conducted investigations to determine benefit eligibility, gathered medical information to identify proper treatment and proper recovery times. Communicated with claimants, employers, and various medical professionals to gather information regarding the application for, payment of, and ongoing management of benefits. Approved/denied benefits accordingly and responded to various written and telephone inquiries regarding eligibility, approval/denial determinations, status and continuation or closure of benefits.

ADDITIONAL EXPERIENCE

Operations Specialist II

2015– 2017

Edward Jones

Chandler, AZ

Broker's Assistant

2013 - 2015

Main Street Renewal

Chandler, AZ

ACHIEVEMENTS

Director of Operations (Volunteer)

2012 - 2013

Youth Institute of Science and Technology

Ashanti Region, Ghana

- Established an organizational budget and developed a debt repayment plan for the organization, operated a full year without any loans for the first time since its inception. Effectively made the organization financially self-sustainable by closely monitoring, recording, reducing expenses and increasing revenues.
- Oversaw and actively participated in opening the program's first computer lab, debt-free. Negotiated workmanship, materials for security set up, port clearance and transportation of 60 computers. Electrically set up the lab for future additions.
- Successfully taught one year of computer skills- students by the end of the course were able to write basic articles using Microsoft Word, make PowerPoint presentations with effects, tables, and charts and use Microsoft Excel for data calculation and produce pivot tables.

PROJECTS

Google Book Search | **GitHub:** <https://github.com/azu20/MERN-Google-Books-Search> | **Deployed:** <https://api-search-books.herokuapp.com/>

- This Google Books Search app allows the user to search by book name, select each book to view additional details and add books to their favorites list.
- MERN stack app, uses React components, works with helper/util functions, and utilizes React lifecycle methods to query and display books based on user searches. It also uses Node, Express and MongoDB so that users can save books to review or purchase later.
- **Tools / languages used:** JavaScript, React, MongoDB, Mongoose, Express, Node.js, Bootstrap (React), JSON

Washburn Real Estate | **GitHub:** <https://github.com/azu20/real-estate> | **Deployed:** <https://washburn-real-estate.herokuapp.com/>

- This app provides similar services to Zillow.com, in addition it allows real estate agents to track customer trends and collect other metadata for marketing purposes.
- MERN stack app, uses Auth0 for login, third party APIs including Realtor and Leaf, Material Design for Bootstrap CSS framework, reCharts to graph/chart data. Users can search for properties by city and state and ability to save properties to favorites list. The Admin page allows real estate agents to view user info, user trends and other metadata via graphs and charts.
- **Tools / languages used:** Javascript, Mongoose, JSON, React, Express, Nodejs, Material Design for Bootstrap (REACT), ReCharts,

DasFlix | **GitHub:** <https://github.com/denzgrant/DasFlix-> | **Deployed:** <http://www.dasflix.com/>

- This app allows the user to search movies and tv shows available on different streaming services. The user can create a watchlist and save their favorite movies or shows.
- Uses passport.js for login and authentication, applies CRUD and follows MVC paradigm, uses TheMovieDB third party API, and tracks user trends to display a watchlist of trending shows and movies.
- **Tools / languages used:** Javascript, JSON, SQL, Sequelize, Node, BCrypt, Passport, Express, Handlebars
